

A. Harold + Associates, LLC

LOGISTICS

A. Harold and Associates, LLC (AHA) is a global leader in logistics, analytics, and life cycle sustainment. AHA provides effective solutions that lead to exceptional products and services while delivering the quality and results you need for your mission. AHA's in-house professionals and established international network make us your cost-effective, end-to-end solution.

COMPETENCIES

- Reliability, Accountability, Maintainability (RAM)
- Life Cycle Management and Sustainment
- Integrated Logistics Support Plan (ILSP)
- Global Supply Chain Management
- Enterprise Resource Planning (ERP)
- Configuration Management (CM)
- Level or Repair Analysis (LORA)
- Logistics Product Data (LPD)
- Cost Analysis

LOGISTICS CONTRACT EXPERIENCE

Aviation Training System (MCATS) Equipment Purchase

U.S. Marine Corps – Total Value: \$1,057,800

AHA reviewed and assessed the Marine Aviation Training Support Squadron (MATSS) electronic classroom requirements for 11 sites at three separate USMC bases. Procured, delivered, and installed the classroom equipment.

Comprehensive Interior Design (CID) Equipment

U.S. Army Corps of Engineers – Total Value: \$2,260,490

AHA procured and installed a complete CID equipment package to yield a turnkey Special Operations Forces (SOF) Aviation Foreign Internal Defense (AvFID) facility. Equipment in this CID package includes but is not limited to industrial storage, workbenches, metal security cages, powered mobile shelving systems, mechanical assist mobile shelving, mechanical assist weapons racks, tool cabinets, and cutting tables.

Comprehensive Interior Design (CID) Furniture

U.S. Army Corps of Engineers – Total Value: \$2,279,067

AHA procured and installed a complete CID furniture package to yield a turnkey SOF AvFID facility. Furnishings in this contract included desks and case goods, seating, tables, systems furniture and audio/visual support furnishings, a washer and dryer, refrigerators, and microwaves.

High-Mobility Multipurpose Wheeled Vehicle (HMMWV) Egress Assistance Trainer (HEAT) Electrical Kit Components

U.S. Army – Total Value: \$5,078,952

AHA procured, assembled, and delivered electrical kit components and spare parts for the HEAT, which is used worldwide as the primary method for training crews in rollover emergency egress drills.

Joint Air Logistics Information System (JALIS) Program

Commander, Space and Naval Warfare Systems Command – Total Value: \$4,457,767

AHA provides The Sea Warrior Program Office, PMW 240, under the Navy PEO-EIS, Information Technology (IT) support and technical solutions for the Department of the Navy (DON) within the Manpower, Personnel, Training, and Education (MPT&E) and Distance Support business system domains.

Kuwait Air Force (KAF) F/A-18 Aircrew Computer-Based Training (CBT) Upgrade

U.S. Navy – Total Value: \$2,254,843

As part of an International Foreign Military Sales (FMS) project, AHA provided analysis, design, update, and new development tasks for 88.5 hours of Level 2/3 CBT for the KAF, which was upgrading its F/A-18 aircraft to incorporate improvements similar to the U.S. Navy F/A-18 Systems Configuration Set (SCS) 25X(K) platform. Tasks included on-site installation of the electronic classroom, a Learning Management System (LMS), and 24 hours of on-site Train-the-Trainer Instructor-Led Training (ILT).

Mine Resistant Ambush Protected (MRAP) All-Terrain Vehicle/Warfighter Information Network-Tactical (M-ATV/WIN-T) Electrical Component Supply

U.S. Army – Total Value: \$1,480,642

AHA provided the electrical supplies necessary to build cable assemblies required for the M-ATV/WIN-T. Services included acquisition, inventory, kitting, marking, and packaging of electrical components for the project.

Marine Corps Aviation Training System (MCATS) Electronic Classrooms

U.S. Navy – Total Value: \$1,057,800

AHA reviewed and assessed the classroom requirements for 11 sites, in two states, at three USMC bases (Yuma, AZ; Cherry Point, NC; and New River, NC). AHA procured, delivered, and installed the equipment at four of these sites and delivered a classroom Equipment Inventory Report (EIR) for each site.

Medical Simulation Training Center (MSTC), Program Executive Office for Simulation, Training, and Instrumentation (PEO STRI)

U.S. Army – Total Value: \$3,381,591

AHA provided Logistics Product Data (LPD), including compiled results of engineering and logistics information captured during survey of 21 MSTC sites. AHA developed a Configuration Management Plan (CMP), Capabilities Development Document (CDD), technical publications to include Operators User's Manual and System Maintenance Manual, instructional courseware, and Item Unique Identification (IUID) creation, registration, and implementation.

Mine Resistant Ambush Protected (MRAP) Egress Trainer (MET) Electrical Control Systems, Program Executive Office for Simulation, Training, and Instrumentation (PEO STRI)

U.S. Army – Total Value: \$8,173,872

AHA assembled, integrated, and delivered electrical control systems and spare parts for multiple variants of the MRAP MET, utilized worldwide as the primary method for training crews in rollover emergency egress drills.

Program Executive Office for Simulation, Training, and Instrumentation (PEO STRI) Mine Resistant Ambush Protected (MRAP) Egress Trainer (MET) Electrical Control Systems

U.S. Army – Total Value: \$7,211,793

AHA assembled, integrated, and delivered electrical control systems and spare parts for multiple variants of the MRAP MET, utilized worldwide as the primary method for training crews in rollover emergency egress drills.

Rapid Equipping Force Tactical Combat Casualty Care (REF TC3), Program Executive Office for Simulation, Training, and Instrumentation (PEO STRI)

U.S. Army – Total Value: \$2,691,613

AHA provided procurement, configuration, and logistics support to assemble/integrate 16 REF TC3 Kits worldwide. Logistic support included creating and updating technical manuals, training documents, and logistics support data in addition to development and delivery of a REF TC3 Kit Technical Data Package (TDP). Upon fielding of the devices, AHA provided new equipment training on each simulation device. AHA also maintained the supportability of the system through planning, implementation, and verification of materials.
